

In a world where people are saying that music should be heard and not seen, Aaron has the complete solution. When used in conjunction with the Aaron SAT-50 the SUB Series systems will merge into your decor but still deliver a sound that will satisfy even the most discerning audiophile. The many possible benefits from owning an Aaron sub-woofer don't end there. If your home theatre system doesn't shake the furniture in an earthquake scene or you have small speakers that can't produce those lower octaves, then the Aaron SUB series is the solution. Both models have the kind of dynamic bass that's sure to bring your favourite form of entertainment to life. Because these systems each have their own built-in amplifier the sub-woofer is self contained and simple to add to any system, especially since they have a circuit that senses when your stereo is in use so it turns itself on and off. There are of course many other features built into the Aaron sub-woofers such as the active crossover filter that can be adjusted so it blends perfectly with the rest of your stereo system. A volume control with which you can tailor the sound level to your personal taste and a servo active loudness control that contours the bass as you turn the stereo's volume control down. Best of all with our unique "Low Q Ratio" technology you can be assured of fast, deep, clean bass. With our sub-woofers remote switching and servo control we have done our best to make our sub-woofer the box that hides from sight but not from sound.

*Low  
Ratio*

## F E A T U R E S

Remote auto power on / off  
 High level input  
 Low level input  
 Level control  
 Cross-over frequency adjustment  
 Phase switch  
 Servo active loudness control  
 Acoustically neutral fibre board cabinet  
 Epoxy glued cladding  
 PVA glue used in all joints  
 Low Q Ratio alignment  
 Cloth speaker cone surrounds  
 Two layer speaker cone construction  
 Highly stable vitrified magnets  
 Very large, high flux magnets  
 Polyester Imide voice coil windings  
 High input power tolerance  
 Spring clip terminals  
 Wide environmental tolerance  
 Two year warranty
